Testimonial for Russell Bynum, Attorney at Hestad Law Office Madison WI

A year ago, I was involved in an auto accident where I was not at fault. The police report, as well as the person who caused the accident all agreed that the other party was 100% responsible. So after receiving medical care and getting my vehicle fixed, I thought that the other party's insurance company would reimburse my insurance company for my medical expenses without my intervention. I learned I was incorrect in that assumption when my chiropractor gently asked me when they were going to get paid! I never thought about hiring an attorney, since I figured this would all be cut and dry since the other party admitted fault. However, after talking with the other party's insurance company, I found out that they were dragging their feet regarding payment and reimbursement.

I had just been introduced to Russell Bynum, but he quickly became someone who I could trust to get the job done. Russ took a limited amount of my time, explained all my options thoroughly, and counseled me through a series of events that ultimately resulted in my chiropractor getting paid what they were due, as well as my insurance company getting reimbursed. I had always heard about "ambulance chaser" attorneys, and I was apprehensive when starting this whole case because of that stigma. But I needed to get payment to the folks that deserved it. Russ really made our family feel at ease, was very professional, and also became a friend. He gave us peace of mind.

I have since referred Russ to another friend in need, and will continue to recommend him to anyone who needs a great, honest attorney who gets results!

Sincerely,

Anke Johnson
