

For the first time in my life I'm a homeowner. Less than a year ago, my fiancé and I bought our first home together. Since then, we have been making a conscience effort to improve our lifestyle and home environment. Recently, we purchased the Shaklee "Get Clean Kit" from Anke. My fiancé, the skeptic, wasn't really on board with the idea because he really liked his name brand cleaners. So, in an effort to prove him wrong, I mixed up some Basic H in a disguised name brand bottle. Immediately I noticed a difference. The spotty residue our previous brand left behind on our countertops was no longer. The highlight of my cleaning was our glass cook-top. Previously it would take 3-4 complete spray downs to get it to a somewhat streak-free shine. With Basic H, it took once and it was TOTALLY streak-free. A few hours later, my fiancé noticed and complimented me on how great the kitchen looked. So, I told him the truth, that I had disguised his name brand with Basic H. Within minutes he was checking out the rest of the cleaning products included in the kit. Before long he was outside cleaning the grill with the Scour Off Paste, which now looks like new again. Needless to say, the skeptic is convinced!
