

We recently had a DISH system installed by Star Satellite. We really appreciate the prompt service from the beginning, including Tom's initial help in explaining the many choices and options that were available. The package we ended up choosing was not what we originally thought about acquiring, so Tom's advice and time talking it through proved very helpful in our decision making. They were able to work around our family's busy work and travel schedule for installation, and operation and set up of the system were professionally and thoroughly explained as well. We also got an additional unexpected bonus for choosing autopay! As a parent, both the on screen information and ideas from the employees at Star Satellite made it easy for us to set up the system so we feel good about having our elementary aged children using it independently. We are all really enjoying the many channels that a family with a broad range of ages and interest requires and love the DVR feature too!
